

Suicide Prevention, Intervention, and Postvention

Why do people kill themselves? How do I ask someone if they are feeling suicidal? What do I do if they say they ARE suicidal? How do I deal with the strong emotions suicide generates?

This training will provide answers for these and other questions many of us have about suicide. It will provide you with basic information about suicide as well as help you develop practical skills for prevention, intervention and postvention. Small group role plays will allow you to apply the suggested techniques as you learn them. We will also develop a short educational briefing about suicide that you can give to your local agencies.

This training is open to anyone who wishes to learn more about intervening across the suicide spectrum. Professionals from the fields of social work, emergency services, security, human resources, EAP, education, and mental health may all benefit. This course should be helpful for persons at all levels of experience in working with other people.

Course Learning Objectives:

Students will be able to:

- Identify 3 physical, emotional, and verbal warning signs of suicide
- Identify 5 do's and don'ts of successful suicide intervention
- Identify probable feelings and reactions of suicide survivors
- Identify useful helping strategies when working with suicide survivors
- Identify appropriate interventions to apply when responding to a suicide
